

preliminary

SiC Schottky Diode

 $V_{RRM} = 1200\text{ V}$
 $I_{FAV} = 2 \times 25\text{ A}$

Ultra fast switching
 Zero reverse recovery

Part number
DCG45X1200NA

Backside: isolated

UL pending

Features / Advantages:

- Ultra fast switching
- Zero reverse recovery
- Zero forward recovery
- Temperature independent switching behavior
- Positive temperature coefficient of forward voltage
- $T_{VJM} = 175^{\circ}\text{C}$

Applications:

- Solar inverter
- Uninterruptible power supply (UPS)
- Welding equipment
- Switched-mode power supplies
- Medical equipment
- High speed rectifier

Package: SOT-227B (minibloc)

- Isolation Voltage: 3000 V~
- Industry standard outline
- RoHS compliant
- Epoxy meets UL 94V-0
- Base plate with Aluminium nitride isolation for low thermal resistance
- Advanced power cycling

Terms & Conditions of Usage

The data contained in this product data sheet is exclusively intended for technically trained staff. The user will have to evaluate the suitability of the product for the intended application and the completeness of the product data with respect to his application. The specifications of our components may not be considered as an assurance of component characteristics. The information in the valid application- and assembly notes must be considered. Should you require product information in excess of the data given in this product data sheet or which concerns the specific application of your product, please contact the sales office, which is responsible for you. Due to technical requirements our product may contain dangerous substances. For information on the types in question please contact the sales office, which is responsible for you. Should you intend to use the product in aviation, in health or live endangering or life support applications, please notify. For any such application we urgently recommend

- to perform joint risk and quality assessments;
- the conclusion of quality agreements;
- to establish joint measures of an ongoing product survey, and that we may make delivery dependent on the realization of any such measures.

SiC Diode (per leg)				Ratings		
Symbol	Definitions	Conditions	min.	typ.	max.	
V_{RSM}	max. non-repetitive reverse blocking voltage				1200	V
V_{RRM}	max. repetitive reverse blocking voltage				1200	V
I_R	reverse current	$V_R = V_{RRM}$		35 65	200 400	μ A μ A
V_F	forward voltage	$I_F = 10$ A				V
		$I_F = 20$ A		1.5	1.8	V
