

## SMT Breakout PCB for 32-QFN or 32-TQFP – 3 Pack!

PRODUCT ID: 1163

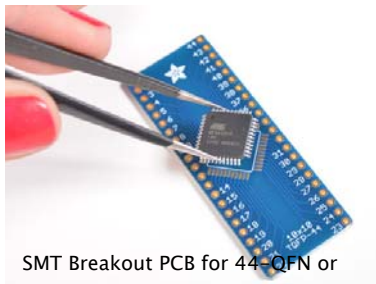

## DESCRIPTION

Beguiled by a fancy new chip that is only available in a QFP or QFN pinout? This breakout PCB set will make your life much much easier and get you prototyping faster than ever. One side has a 32-QFP pin out with traces going to two rows of 0.1" spaced holes, the other has 32-QFN. Solder your chip to either side and you're ready to rock on any solderless breadboard.

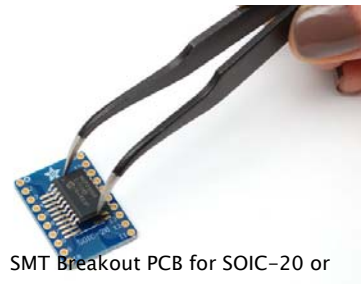

Each item comes with three PCBs, each PCB is identical and can support either a 7mm square QFP or 5mm square QFN chip. Standard thickness PCBs, with 0.6" spacing between the two rows.

The first run of these has a typo on the top right of the QFP where the pin # are off by one, we'll fix this in the next run of boards.
